Survival Plan May Get 'Dry' Run' in Idaho

BOISE, Jan. 31.—An Idaho civil defense official today said Idaho's survival plan will be given a "dry run" test this year.

Col. Frank Brinkman, Nampa, director of the state civil defense, said he expects to call a meeting of the state civil defense council, regional and state civil defense officers, to discuss the plan for testing the 1938 civil defense operation.

Brinkman conferred with William Kelly, federal civil defense operations planner, and with the state civil defense council, which is headed by Gov. Clegg, to discuss the plan for testing the 1938 civil defense operation.

Brinkman said that the Idaho civil defense plan will be given a "dry run" test this year. The plan is to have a "dry run" test of the 1938 civil defense operation.

Brinkman said that the Idaho civil defense plan will be given a "dry run" test this year. The plan is to have a "dry run" test of the 1938 civil defense operation.

Suspect Held 'Innocent' on Forgery Case

A Twin Falls district court jury Thursday afternoon returned a verdict of innocent after a day-long trial of James Charles (Jim) Taylor, charged with forgery.

Immediately after the verdict, Taylor was released on his own recognizance.

Taylor was accused of forging the signature of his brother, William Taylor, on a check for \$100.

The check was cashed at the Twin Falls National Bank.

TWIN FALLS

Their Dairy Animals Are High Producers

Owners of some of the highest-producing dairy animals in Twin Falls recently pose with trophies they received Thursday at the annual meeting of the county Dairy Herd Improvement association. From left are

Harold Peterson, Charles Tippet and W. T. Lammers, all Buhl. Members of the association maintain accurate records of herd production to increase milk production efficiency. (Staff photo-engraving)

Records Improve Efficiency of Dairy Herds, Speaker Says at T.F. Meeting

(From Page One)
 President, John Cothran, Buhl, secretary, Leonard, vice president, and Cothran and Rosen.
 Trophies were awarded to owners of the highest-producing herds in each association unit in the county. The highest-producing herd of more than 20 cows is owned by Lammers dairy, Buhl, a unit No. 1 herd. The grade Holstein herd produced an average of 12,300 pounds of milk and 568 pounds of butterfat. High herd above 30 cows in unit No. 1 is owned by Irvin Elbert, Twin Falls. His registered and grade Holstein herd produced an average of 12,200 pounds of milk and 418 pounds of butterfat.
 High herd between 15 and 30 cows is owned by Charles Tippet, Buhl, unit No. 1. The grade Holstein herd produced an average of 12,257 pounds of milk and 458 pounds of butterfat.
 Next highest herd between 15 and 30 cows in unit No. 2 is owned by J. J. Kaufman, Twin Falls. His herd of registered Holsteins produced an average of 11,590 pounds of milk and 471 pounds of butterfat.
 High herd under 15 cows is owned by L. J. Trencklen, Twin Falls, unit No. 2. His registered Holstein herd produced an average of 12,547 pounds of milk and 459 pounds of butterfat.
 Second highest herd under 15 cows is owned by R. Peterson and son, Buhl, unit No. 1. Their herd of registered Holsteins produced an average of 13,179 pounds of milk and 460 pounds of butterfat.
 The highest-producing 3-year-old in the county is owned by the Lammers dairy. The grade Holstein cow produced 13,420 pounds of milk and 540 pounds of butterfat over the 305 days the tests were conducted during the year.
 Records for the high 3-year-old cow, indicating owners, breed, pounds and days, are J. J. Kaufman, registered Holstein, 15,300 pounds of milk, 547 pounds of butterfat, and M. R. Cothran and son, Buhl, unit No. 1, grade Guernsey, 14,100 pounds of milk, 516 pounds of butterfat, both 305 days.
 High 4-year-old records are R. Peterson and son, registered Holstein, 17,650 pounds of milk, 694 pounds of butterfat, 305 days, and J. J. Trencklen, registered Holstein, 15,150 pounds of milk, 574 pounds of butterfat, 288 days.
 Records for the high mature cow are Yvonne's dairy, Twin Falls, unit No. 2, grade Holstein, 18,860 pounds of milk, 658 pounds of butterfat, and Lammers dairy, grade Holstein, 18,200 pounds of milk, 700 pounds of butterfat, both 305 days.
 High cow records for each breed are: grade Holstein, Young's dairy, 18,860 pounds of milk, 658 pounds of butterfat; and Lammers dairy, mature, 16,200 pounds of milk, 700 pounds of butterfat; registered Guernsey, W. W. Mathiasen, Piler, unit No. 1, mature, 12,250 pounds of milk, 590 pounds of butterfat, grade Guernsey, Gary Carter, Twin Falls, unit No. 2, 4-year-old, 16,710 pounds of milk, 459 pounds of butterfat, and registered Ayrshire, D. C. Smith, Buhl, unit No. 1, 3-year-old, 12,180 pounds of milk, 503 pounds of butterfat, all 305 days.
 Further high cow records for each breed are: grade Jersey, H. J. Van-Eden, Buhl, unit No. 1, mature, 11,250 pounds of milk, 500 pounds of butterfat, 305 days, and L. A. Hansen, mature, 9,760 pounds of milk, 520 pounds of butterfat, 305 days, grade Milking Shorthorn, Daniel Kaufman, Piler, unit No. 1, mature,

Other unit No. 2 records include: 137 average days on pasture, 2,200 average roughage pounds per cow, and 1,566 average grain pounds per cow.
 Past average pounds of butterfat per cow records for unit No. 1 are: 1952, 328.7; 1953, 352.8; 1954, 304.4; 1955, 374.0; 1956, 355.7, and 1957, 372.2.
 Unit No. 2 records are 1956, 358.3; 1955, 370.2; 1954, 381.5, and 1953, 359.2.

1958 FORD

The full, dignified man with the umbrella was the Prime Minister of England, Neville Chamberlain. When he stepped off the plane in his native land after that historic meeting, he was smiling. He felt that he had just insured peace for the world.

He had just returned from the Munich, There, with the Premier of France, Deladier, and with Premier Mussolini of Italy. Chamberlain had entered into a four-power peace pact with Benito Mussolini, Adolf Hitler and the Czechoslovakian and gave it to Germany. For a price, peace had been bought for Europe.

The pact was signed just 11 hours before the October 31 deadline had given. His troops were prepared to march into Czechoslovakia. Now they stood not march, and we had been avoided — or so that honest, peaceful man thought as he stepped off his plane in England. For Chamberlain couldn't know that the "Munich Pact" was but a temporary delay in the war that was soon to come.

Remember the year?

There was a time when a car buyer knew just what was in his contract when he signed to buy a new car. At that time, the car buyer knew just what was in his contract when he signed to buy a new car. At that time, the car buyer knew just what was in his contract when he signed to buy a new car.

Demos Asking 'Ike' to Boost U.S. Spending

WASHINGTON, Jan. 31 (AP)—The Democratic party and its political allies are pressing President Eisenhower for more spending. This is remarkable because the Eisenhower administration already has established a new high for spending the taxpayers' money.

Pressure for spending is not limited to Democrats and such left-of-center political allies as New York's liberal party and spokesmen for organized labor. Republican members of the congressional farm bloc, for example, have put on the pressure for more spending to support farm prices.

Spending pressure from whatever source but, especially, from Democratic sources raises a question: How much spending is enough or, more importantly, how much is too much?

Back in the Truman years, the Democratic party was in a position to fix spending levels and objectives to suit its idea of what was good for the country. That idea also is considerably influenced, regardless of who runs the government, by considerations of what would be good for the party-in-power.

During a two-year lapse during the term of the 80th congress, Democrats ran the White House and the legislative branch during the Truman years. These Democratic managers of the nation and trustees of the people's welfare were liberal spenders but not so liberal with the people's money as the Eisenhower administration has been.

This, of course, was a contradiction of all reasonable forecasts and for several reasons. The Truman administration in its final years had an expensive war going on and there had been a recession in the economy.

For promised that he could and would reduce government spending by 25 per cent. The Roosevelt economy effort continued not more than a couple of months after his inauguration on March 4, 1933. Thereafter government spending consistently exceeded all previous peace-time records.

During the national defense upsurge aroused by the Soviet-Danish launching of Sputnik I, President Eisenhower pledged greater defense spending, notably about \$1.5 billion into outer space. He said

Sam Van Winkle Finally Wakes up

Morse Hits GOP

NEW YORK, Jan. 31 (AP)—Sen. Wayne Morse, D. Ore., last night charged the Republicans with keeping the people in the dark on foreign policy.

Morse, speaking at a Young Democrats meeting, said the administration has failed to make the issues clear and to keep the people informed.

Much of the additional spending would be offset by elimination of whole categories of non-defense programs.

It is not likely, however, that the taxpayer will get the benefit of these or any economies. The new Eisenhower budget maintains a high level of home front as well as of defense spending.

Judge Director Percival C. Brundage was before the senate finance committee this week. Republican and Democratic members, alike, warned him that congress will not accept cuts in home front spending. Not surprising, this being an election year.

Germany's Army Is Due for Nikes

DUESSELDORF, Germany, Jan. 31 (AP)—The West German armed forces announced today that U. S. Nike air defense missiles have been built in this Rhine-Ruhr industrial area.

The announcement said the Nikes would not be equipped with nuclear warheads. They are to be operated by the Germans as part of their higher and conventional anti-aircraft defense system.

Income Listed

SAN FRANCISCO, Jan. 31 (AP)—Crown Zellerbach corporation reports it net income for 1957 was 38 million dollars, equal to \$1.68 a share, compared to \$1.25 a share for 1956. Net income was 24 per cent below the all-time high of \$20,046,000 reported in 1955. Sales of 400 million dollars were down slightly from 1956 and production of paper and paperboard also fell off.

Children Stricken

JERUSALEM, Israel, Jan. 31 (AP)—Quick action by two hospitals was credited today for preventing any deaths among 300 school children who contracted food poisoning from school lunches.

Doctors and nurses from the Dikur Yolim and Hadassah hospitals rushed to the school with stomach pumps as soon as the alarm was sounded yesterday. They set up clinics and treated the children on an assembly line basis.

The United States now grows more than half of the world's soybean crop. Other than its many food uses, it is planted to replenish nitrogen-starved soil.

Rail Accidents In Britain Kill 11; Injure 95

LONDON, Jan. 31.—Two British electric trains collided head-on in heavy fog today while railroad crews were still clearing debris from a similar collision that took 10 lives and injured 87 persons last night.

The accident, in Britain's second worst peacetime rail disaster, killed one person and injured eight.

The dead man was the engineer of one train, an empty Pullman reported the engine and three passengers on the second train were hurt.

The crash was Britain's third worst peacetime rail accident in two months.

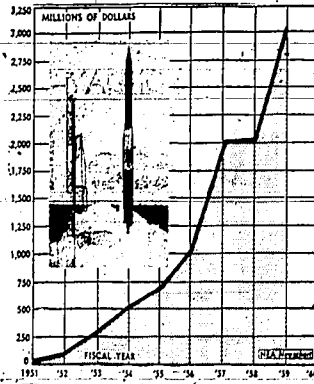

Last night's collision occurred during the height of London's commuter rush hour when one train plowed into the rear of a second near Dagenham station in east London.

The fog was London's second major one of the winter. An almost identical wreck took place during the first fog last Dec. 4 when an express train crashed into the rear of a commuter train in the Lambeth station of London.

SOLDIER ASSIGNED

RUPERT, Jan. 31.—Mr. Lee L. Dockstader, son of Mrs. Lois M. Anderson, Rupert, recently was assigned to the U. S. army advisory group in Korea. He is an aircraft mechanic.

Zooming Missile Cost

Now quickly the military picture can change as dramatized by the zooming curve, representing cost of our missile program, on Newschart above. In fiscal 1951, we allocated only 21 million dollars for missiles. The 1953 budget calls for \$300,000,000 dollars. It is estimated that half the 1953 missile expenditures will be for the longer range ballistic type.

Air Service Tops Surface in Trips

WASHINGTON, Jan. 31.—The civil aeronautics board announced yesterday that airline passenger miles topped both railroads and bus lines in 1951, for the first time.

The CAB said U. S. airlines flew 25,000,000,000 passenger miles last year, compared with an estimated 25,000,000,000 for buses and 21,000,000,000 for railroads.

Officials Elect

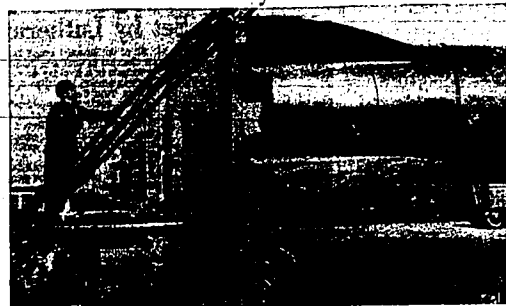

KING HILLS, Jan. 31.—Elders and deacons of the United Presbyterian church met Monday at the home of the Rev. and Mrs. R. L. Barnes.

Mrs. James Gerke was elected president; Mrs. Tom Moore, vice president; Mrs. Dick Roice, secretary; and Mrs. Ted Moore, corresponding secretary.

Twelve members studied the "Impassioned" under the general theme of nature. A discussion period followed.

Fares on the Paris metro, or subway, cost eight U. S. cents. Fares on the New York subway are 10 cents.

Missile Ready for Action

Graduate students preparing to train a Redstone missile into firing position frame another Redstone weapon in the background at the Redstone arsenal's U.S. army guided missile school at Huntsville, Ala. (AP wirephoto)

Surgery Provides Normal Breathing

OAKLAND, Calif., Jan. 31.—A month-old baby in 100% oxygen today thanks to an operation that enabled him to breathe normally for the first time in his young life.

Until three weeks ago, little Jack Brewer could only wheeze and gasp. The reason was that a congenital windpipe, every breath he took was an effort.

Jack was only a few weeks old when doctors in his home town of Moscow, Ida, discovered his condition. They advised his parents, Mr. and Mrs. Donald L. Brewer, to bring him to the Children's Hospital at the East Bay for treatment.

On Jan. 3, Jack underwent a three-hour operation. Surgeons removed his trachea and attached the blood vessel to his chest wall to relieve the pressure on his windpipe.

A high speed ferry boat travels between the mainland of Italy to the island of Sicily, making the 8-mile crossing to Messina in just 10 minutes.

Buhl Leadership School Concludes

Buhl, Jan. 31.—The first inter-church leadership training school, which closed on Thursday evening, was a total success.

The school, under the direction of Earl Allen, was conducted at the church of Nazareth for three evenings, Jan. 24, 25, and 26.

Sixty-eight enrolled on the opening night, 22 the second night and three the closing night.

The school is considered to have been more than successful by many.

'Legal' Revolt Handed Nazi Rule of Reich

FRANKFURT, Germany, Jan. 31.—Twenty-five years ago yesterday President Paul von Hindenburg signed a proclamation appointing a new premier and condemning five million Germans to death.

It was then—really, Adolf Hitler took over the chancellorship and embarked on a decade of sanguinary rule which drenched Europe in blood.

Hitler and his lieutenants ended their rule 12 years later in the only way they admitted it could end, as corpses.

The Germans who survived crawled from the rubble in 1945 and slowly established a new constitution with built-in safeguards against another democratic suicide.

But even today they unapologetically recalled the fascist proclamation of Hitler on a century ago.

Hindenburg distasteful and distrustful Hitler and only four days after he had declared he would never appoint "the little Austrian corporal" as chancellor.

But by Jan. 30, 1933, the 85-year-old president, apparently alarmed by rumors of a violent government coup in the making, finally agreed to accept Hitler as chancellor.

Less than two months later on March 23 a hastily-called parliament voted Hitler dictatorial powers.

Six months later, all other parties had been dissolved or banned and Germany became a totalitarian state.

Hindenburg appointed Hitler under the emergency clause which did not require parliament's approval.

The country had been run by this clause since 1900, when continued squabbling in parliament made it impossible to form any kind of majority.

But Hindenburg's choice was a popular one. More than 17 million Germans of 39 million voted next in the relatively free elections Hitler called two months later. He then banned the communists to give his party a majority. The "legal revolution" was complete.

**Grange Hall Gets
Cleaning by Crew**

KING HILL, Jan. 31.—Grange members who worked on cleaning up the Grange hall Wednesday were Karl Anderson, the Rev. R. J. Barnes, Dick Boone, C. E. Spruce and Earl Ellis.

Mrs. Rolos and Mrs. Ellis served the dinner.

Grange members who worked Tuesday replacing broken places in the ceiling were James Oerke, Spruce, Wesley Fink, Ella, Terrell, Foster, Arthur Green and Melvin Heston.

Serving the dinner were Mrs. Oerke, Mrs. Foster and Mrs. Heston.

Rigid Demands of Interplanet Travel To Combine Safety, "Home" Comfort

WASHINGTON (NRA)—Now that science has its foot in the doorway to space, it's time to start thinking about how to furnish your first interplanet trip and you can meet the rigid demands of interplanetary travel.

The months or even years that it will take to complete tours through the mysterious environment of outer space will require you to stay in top notch physical and mental shape at all times.

That's why some of the best brains of modern science are trying to design interplanetary travel accommodations to combine the most elaborate safety devices imaginable with all the comforts of home.

Dr. Eugene S. Konecni, one of the top outer space research specialists for Douglas Aircraft company, points to future development of a special sealed flight cabin as essential to man's conquest of the stars.

The cabin would offset the dangerous environmental conditions of outer space by permanently storing the atmosphere of the earth.

"In the near future sealed cabin research and development should reduce if not solve the major 'high altitude problems,'" Dr. Konecni explains. "Boiled cabins would afford pilots and crew safety, comfort and freedom of movement without the encumbrance of a pressure suit."

What it will take to provide ideal living conditions within the sealed cabin was revealed by the Douglas Aircraft scientist at a recent meeting of the American Rocket society.

First of all there's the problem of keeping clean. Dr. Konecni explains that a shower will become a necessity rather than a luxury. Also, you'll need a laundry for a fresh set of clothes every two days. And your clothes will have to be light weight and fast drying.

Since supermarkets probably won't be built on outer planets for years after the first space flight, you'll need to stock up on plenty of dried, frozen or sealed packaged food. Some of it might even be in pill form.

If you're the nervous type who has to pass the floor, you'll just have to learn to sit back and take it easy. The lack of gravity will probably cause you to spend a lot of time strapped in a chair fastened to guide rails.

This will enable you to acclimatize around the floor of the rocket ship without fear of suddenly banging your head on the ceiling. Flash lights, important hand tools and pencils will have to be magnetized so they will be readily available.

Actually, a trip to Mars is likely to be more relaxing than a luxurious Caribbean cruise. A night's case of the filters when flying thousands of miles into outer space could lead to disaster.

That's the ultimate comfort. The ship interior should be well lighted. And its decor should be as aesthetically pleasing as the inside of a ritzy penthouse apartment.

Automatic controls will eliminate the danger of driver fatigue. All you should have to do is occasionally check a highly simplified control panel to make sure everything is running right.

And if you should collide with a meteor, just remain calm. You stand a better chance of surviving than you were involved in an auto crash.

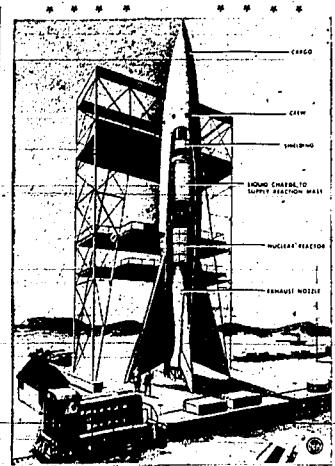

Ultimate Arm?

WASHINGTON, Jan. 31.—That secret bow and arrow study locked deep in government mystery proper here bow and arrow-type dart gun weapons.

Then, loquacious in check, the staff memorandum added that a house committee has received comments that the bow and arrow study is being kept secret because such may be the only weapons to survive after an atomic attack. Or perhaps it was classified in connection with the recent Indian assault on a North Carolina high meeting, it said.

BOAT BANK IS TOPIC

BURLEY, Jan. 31.—Marlin Lind, manager of the local agricultural stabilization and conservation office, will speak on the soil bank program and changes for the future at the Monday noon meeting of the Chamber of Commerce in Coualen Rooming room in the National hotel. All farmers are invited.

One form of space ship to carry passengers on interplanetary trips is this dome-powered rocket envisioned by a General Electric physicist. Sketch loses rocket's components.

Dr. Konecni explains that the hull of the cabin could be made out of two layers of pressure resistant material. A self-sealing substance automatically repairs any dangerous holes caused by a meteor collision. And just in case this didn't work, passengers could still jump into emergency pressurized space suits.

But no matter how many elaborate safety devices are invented, a manned space flight will still be impossible until some method is developed to continually supply passengers with good, clean air.

Scientists are trying to develop systems of burning up dangerous carbon dioxide and turning some of it into life giving oxygen.

One way alone to adapt the principles of photosynthesis into a special air producing device. Photosynthesis is what enables green plants to convert carbon dioxide and solar rays into energy and release oxygen in the process.

Dr. Konecni explains another method of removing oxygen from carbon dioxide involves the use of copper and ultraviolet rays.

HEALTH RETURNS

Jan. 31.—Mrs. Leonard Heston, again nursing at the local hospital, after being several weeks.

Idaho Students Conscious of Science Before Sputniks Era

By The Associated Press

Idaho college students were well before most interested in science and technology even before Russia launched her earth satellite, the state's four degree-granting institutions.

Somewhat fewer, however, than the sputniks may speed up this trend.

No drastic changes in curriculum are planned to meet the challenge of Russia's technological advancement. But here again, some officials feel that changes already contemplated may be speeded up because of re-awakened American interest in science.

These were the highlights of answers to an Associated Press questionnaire, as given by the presidents of University of Idaho, Idaho State College, College of Idaho and Northwest Nazarene college.

University of Idaho reported a marked increase in recent years in the interest which students show in mathematics. Prof. Kenneth Bush, head of the mathematics department, said:

"When I came here in 1934, the department had only two majors. Students generally were taking only mathematics required for other majors. Today there are 17 mathematics majors."

Enrollment in the university's college of engineering has increased from 403 students in 1933 to 838 last fall, showing the biggest percentage at the Moscow institution.

"The University of Idaho" now is contemplating streamlining work for specialized degrees in science," says Dr. D. R. Theophilus, president.

Like the other schools, the university has no immediate plans to stiffen its entrance requirements.

Idaho State college lightened its prebationary or "slaying in school" standards a year ago.

Dr. Carl W. Arntson, president of ISC, reports: "The number of students checking in technological fields increased significantly even before this fall. The increase has not been so marked in science."

As to the sputnik, he added: "I do not think the impact will be very great at this time. Next year and the years to follow will be more apt to reflect an increased enrollment in the sciences."

At the College of Idaho, a privately endowed school in Caldwell, the percentage of seniors majoring in scientific fields increased from 15 per cent in 1936 to 25 per cent in 1938.

"The College of Idaho does not intend to make any significant revisions in our curriculum simplifying it in the scientific and technological fields," reports Dr. Tom Shearer, president.

"As a liberal arts undergraduate, our primary consideration is to lay the proper ground work and to give students the proper foundation so that, if they are interested in proceeding in scientific and technological fields, they will have adequate preparation for advanced work."

Dr. John E. Riley, president of Northwest Nazarene college in Nampa, outlines much the same

attitude as the other schools and adds the view that "more serious intensive study should be done on the secondary level."

"Certain fringe courses should be supplied as a part of a broad studies in fundamental fields," says Riley, adding, "On the college level we also feel the responsibility to improve and strengthen our educational program."

Such specialized fields as atomic energy and rocket engine design are outside the scope of the Idaho schools, except for the university. Theophilus reports:

"The University of Idaho has been receiving excellent co-operation from the atomic energy commission, which has been supplying equipment and materials, but like all institutions of higher learning today, it could use more equipment and materials."

Russia's twin moons have not jarred industry into pressing any new equipment to Idaho schools, except for one item which McIntosh says was procured to ISO over the telephone. He says he is not yet at liberty to divulge what it is or who is giving it.

McIntosh has expressed his views on sputniks and education in speeches to the state board of education and the Twin Falls Kiwanis club.

"We must do three things," he said. "First, we must identify those who can excel. Second, we must motivate a calculated share of them to pursue intellectual interests. Third, we must make it possible for them to learn with a minimum of wasted effort."

"We must not," he said, "force

Banquet Held

PHILIP, Jan. 31.—Ninety-one persons attended the banquet given for the Red Cross by the Red Cross chapter in Burley. The Rev. W. A. McArthur officiated on England.

Dinner was served by the Rev. of the OES. Values attached to the Buhl, Hollister and Twin Falls.

FOOD SALE PLANNED

PHILIP, Jan. 31.—A food sale for the Red Cross chapter in Burley will hold a sale on Saturday morning at 10 a.m. at the Country market.

The sale will be held for the Red Cross chapter in Burley. The Rev. W. A. McArthur officiated on England.

Dinner was served by the Rev. of the OES. Values attached to the Buhl, Hollister and Twin Falls.

TO OUR MEMBERS

The National Farm Loan Association of Magic Valley announces their annual meeting dates as follows:

TWIN FALLS
February 4, 1958 at the American Legion Hall

GOODING
February 5, 1958 at the Methodist Church

RUPERT
February 6, 1958 at the Fellowship Hall in the Methodist Church

BURLEY
February 7, 1958 at the I.O.O.F. Hall

Registration at 11:15 a.m. and dinner will be served, starting promptly at 12:00 noon. Each Association invites and urges all of its members and their wives to attend their respective Association meeting.

Reds Narrowing Gap in Steel Production

Steel is the backbone of modern nations. Although, as Newsweek shows, U. S. steel production exceeds the combined totals of the Iron curtain countries, it is the accelerated rate of communist production since the end of World War II that has economists concerned. In the past seven years, Russian steel output alone has doubled, compared with a 20 per cent increase in this country. Most Russian production is poured back into heavy industry. American economists warn that if Soviet expansion continues at its present rate, steel output in the USSR will be close to 90 million tons a year by 1972. Communist party secretary Nikita Khrushchev has set a goal of 100-120 million tons by that year. Data from Steel magazine.

Suicide of Young Dramatizes Plight of American Railroads

NEW YORK, Jan. 31 (AP) — The people closest to Robert H. Young say his personal finances were sound and his health good when he shot himself last Saturday.

Why then did this wealthy, prominent, socially elite financier destroy himself?

The consensus in the world of business is that the magnitude of the reverses against the New York Central railroad which he headed was too great to bear. He had put his plans and his dreams in the railroad and they had fallen to earth.

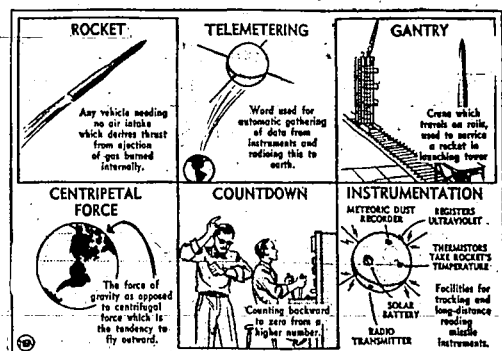

Young had fought and lost before. He was at his best as a fighter. He struggled to control not only the Central, but also to head the Allegheny corporation, a holding company with control over other vast properties.

But this time the situation was different. There was really no one to fight. Wall Street, which admired and feared him but didn't like him too well, believed the suicide had dramatized as nothing else could the desperate plight of American railroads.

That is the business world's conclusion about his motive. It may be right, at least entirely right. He left no note.

His death brought many rumors that Young was in financial trouble. He was really not. He will, to be sure, be remembered as a failure. He will, to be sure, be remembered as a failure. He will, to be sure, be remembered as a failure.

Primer of Rocketry Terms

The definitions above may help in reading news of satellite developments. In a complex scientific field there is a tendency to coin words to provide shortcuts in exchanging information. Knowing the meanings of the words reduces the obscurity.

Community Lists Guests for Week

KING HILL, Jan. 31 — Robert W. Young, Phoenix, Ariz., is a guest at the home of Mr. and Mrs. Allen and Mrs. George Allen, 1001 N. 1st St., King Hill.

Dr. John MacIntosh, Seattle, is a guest at the home of the Rev. and Mrs. R. J. Barnes.

Mr. and Mrs. Olin Dexter and family left Monday for Portland to attend funeral services for their nephew, Bud C. Nichols.

Vernon Graham returned Monday from Larkland air force base, San Antonio, Tex., where he has been training the past several weeks with the national air guard. He is co-pilot of Mr. and Mrs. Robert Graham.

Truckers Fined

KING HILL, Jan. 31 — Four overweight truck fines were levied this week by Justice of the Peace Lynn Sherman.

Roy D. Briley, Murlough, was fined \$20 and \$3 costs for overweight and \$10 and \$3 costs for failure to appear. Phillip Spaulding, Arco, was fined \$10 and costs for overweight; Gerald R. Odogood, \$11.50 and costs, all on overweight.

C. of C. Asks Shoshone Ice Cave Support

SHOSHONE, Jan. 31.—The Shoshone ice cave, located in the Shoshone National Forest, is the main topic of discussion at the annual Shoshone Chamber of Commerce meeting Tuesday noon.

According to the secretary's report, the main inquiry by prospective tourists regards the ice cave. Members were urged to support the attraction and help to make it even more a pull for tourists to the country.

Burton Thorne, president of the chamber, conducted Tuesday's meeting. Report on the annual Shoshone breakfast to be held on Feb. 9 was given by Rupert Manning and Howard Adkins. The breakfast will be served beginning at 7:30 a. m. at the Lincoln school and all county houses and their fathers are invited.

Following the breakfast, the Shoshone will attend the church of their choice. Members of the chamber were asked to turn out to the Shoshone breakfast to help promote the breakfast.

Invitation members for the project include E. L. Shaw, chairman, John Thomas, Howard Adkins, Charles Manning, Guy Shook, E. C. Hahn and Rupert Manning.

The project of sponsoring a breakfast at the Shoshone National Forest is being considered but no action taken. Some other project may be considered to replace the breakfast.

The next well-known Chamber of Commerce meeting will be held on Feb. 7 p. m. Feb. 20 at Rupert at the Shoshone National Forest. The project of sponsoring a breakfast at the Shoshone National Forest is being considered but no action taken. Some other project may be considered to replace the breakfast.

Following the dinner, West will conduct a tour of the new plant which will be in operation three or four years.

Members of the Shoshone chamber will be in the Shoshone National Forest for the Shoshone breakfast. The project of sponsoring a breakfast at the Shoshone National Forest is being considered but no action taken. Some other project may be considered to replace the breakfast.

J. Howard Manning reported the chairman of the year farm, belonging to Mont Johnson, Richard, will be toured on June 6.

Winners Are Reported for Jerome Show

Jerome, Jan. 31.—A Jerome boys trio won first in the junior division and imitations by two Twin Falls youths took first in the senior division at the 11th annual amateur show sponsored Monday night by the business and professional women's club at the Jerome high school auditorium.

The pep band opened the program. Mrs. Gene Jepson gave the welcome address and introduced Mrs. Francis as master of ceremonies. Judges were Mrs. Charles Johnson, Hazelton; Mrs. Howard Adkins, Shoshone; and John T. Gable, Jr., Jerome.

Eddie Perry and Lyle Hill, accompanied by their mother, Mrs. Lloyd Hill, Jerome, won first with their song in the junior division. Margie Granger and Sandy Galt, Wendell, won second with a calypso dance. Dennis Talbot and Connie Lee, accompanied by Julie Talbot on the piano, won third. Honorable mentions went to Gus Webster, a reading; Jimmy Cunningham, vocal solo; and Sandra Druce, Wendell, a ballad.

In the senior division, Dave Hollen was assisted by Doug Harper, both Twin Falls, as reader, won first for a series of imitations. Rudy Piper on the drums and Linda Bonar on the piano took second. Both are from Ruhl. The Jerome high school barbershop quartet took third. They are LaVerne Klim, Mike McCarthy, Larry Silver and Glen Johnson. Honorable mention went to the "Tiger Strangers" and Gayle Ili for her dance.

Prizes for both groups were \$10 first, \$10 second and \$5 for third. Awards and ribbons were presented by Mrs. M. H. Metcalf and Mrs. Gene Jepson. How co-chairmen, awarded special prizes to Beth Butts, Mrs. William Zurek, Ruhl and Mrs. Gerald Hill.

The proceeds will be given as a scholarship to a deserving senior girl in May.

New Defense Chief and Family

McElroy and family: Left to right, daughter Nancy, Mrs. McElroy, daughter Mrs. David Dilling, son Malcolm and son-in-law Dilling eye model B-54 after swearing in.

U.S. Defense Chief McElroy Is Portrait of Man in Motion

WASHINGTON (NEA)—Even before the tall, boyish new secretary of defense, Neil McElroy, moved into his plush Pentagon suite with its fine view of Washington, he found himself in a conflict.

He discovered that he shared the nickname "Mac" with the veteran assistant defense secretary, Wilfred J. McNeil. The two "Mac's" were confused during McElroy's preliminary briefing sessions. He one of his first acts after taking his oath was to inform his new staff:

"Look, McNeil was here first, so he gets the name 'Mac.' As the new comer lets just make me 'Neil'."

This delighted everyone. It's typical of the precise manner in which he has made subsequent vital decisions. The likelihood he would have to wait until 1964, since Vice President Nixon has the inside track for 1960, doesn't faze him. McElroy would be only 55 by then. Close friends trace his immediate

McElroy's memory became a Pentagon legend during an early briefing in which the thrust figures of certain rocket engines were being explained.

"Correct me if I'm wrong, Colonel," McElroy interrupted, "but why was I told at Redstone several times that same engine has 15,000 pounds more thrust than you indicate here?"

The startled colonel excused himself, made a phone call and reported back that the engine he was talking about was an earlier version of the one mentioned at Redstone. Needless to say, word went out to all believers to doublecheck all figures quoted to the new boss.

His first week in office McElroy started the secretaries of navy, air force and army even more than the colonel by summoning them 40 minutes early one morning with his brief explanation: "I think we ought to make a decision on something."

The summons joined the secretaries because former defense boss Charles Wilson never operated that way. Wilson arrived at decisions through well-established channels. At this impromptu meeting, McElroy said he wanted brief opinions on possibly revoking a Wilson order which had cut about \$170 million out of basic military research. Each secretary spoke his piece. McElroy dismissed them with a brief "Thank you, gentlemen" and promptly dictated a memo ordering the research money restored.

In an intimate manner, after quickly-called terse, face-to-face conferences with all officials concerned, the new defense head has made the following additional vital decisions on American defenses:

He told the army it could try to launch a satellite with its Jupiter C missile.

He requested from the White House and got permission to ease the rigid \$3 billion dollars ceiling on defense spending which had been imposed.

He speeded up the previously cumbersome process of issuing central Pentagon policy regulations.

He ordered the army and air force to push feasibility studies on the anti-missile missile.

And he made a dozen other vital decisions on such things as information policy, administrative changes and budget preparation methods.

Not bad going for a former Pfc in a national guard home unit. While assuming this burden of responsibility he still found time to hit several Washington-type recipients.

Mrs. McCloud Named to 4-H Area Council

WENDELL, Jan. 31.—Mrs. M. A. McCloud, Wendell, was elected president of Gooding county 4-H leaders Monday evening at the Grange hall.

Other officers elected are Mrs. Richard Johnson, Gooding, vice president; Mrs. Jess Quiggle, Gooding, secretary; and Martin Barstow, Wendell, treasurer.

Walter Mischke, Wendell, retiring president, conducted the election and the business meeting.

Training classes for 4-H leaders will begin Feb. 24 and continue each Monday for five weeks. Jerry Ditch, county 4-H leader, explained the purpose and necessity for the training classes.

Philip Edwards, Dietrich, international farm youth chairman, was guest speaker. Edwards spent six months in Burma.

Guests were Mrs. Margaret Loomis, Gooding county home demonstration agent, and Mrs. Harold Zimmerman and Scott Zimmerman, Jerome, and Mrs. Harold Hobson, Gooding.

Members of the Wendell Community 4-H club were in charge of the serving of refreshments for the adult and junior leaders.

Family Visits

MALTA, Jan. 31.—Marlene Sibel and Mrs. H. C. Wayne and baby daughter, Mrs. Wayne, arrived in Malta, Calif., have been guests of Mrs. Wayne's parents, Mr. and Mrs. Albert Nicholson, for the past 10 days. Sergeant Wayne will sail for Australia aboard the Shangri-La for six months sea duty.

MEET ATTENDED SPRINGDALE, Jan. 31.—Mrs. James Branson left Thursday for Pocatello to attend the state Farm Bureau winter school. Mrs. Branson is chairman of the third district.

Speaker

REV. J. F. YOUNGER

...superintendent of the Idaho-Oregon district of the Nazarene church, Nampa, will be guest speaker at special services and coronations laying ceremonies for the Jerome church at 11 a.m. Sunday. The new \$75,000 addition to the Jerome church is almost completed following two years of work donated by members of the congregation.

The new portion of the church which faces South Lincoln avenue and avenue D is almost complete according to the Rev. W. H. Hurn, pastor. The building contains 800 square feet and is finished with brick veneer. The \$75,000 structure has been built largely by work done

Jerome's Church Sets Ceremonies

Jerome, Jan. 31.—The Rev. J. F. Younger, Nampa, superintendent of the Idaho-Oregon district, will be guest speaker at the 11 a.m. Sunday service and coronations laying ceremonies for the new Nazarene church sanctuary here.

The new portion of the church which faces South Lincoln avenue and avenue D is almost complete according to the Rev. W. H. Hurn, pastor. The building contains 800 square feet and is finished with brick veneer. The \$75,000 structure has been built largely by work done

Budge Announces Academy Choices

WASHINGTON, Jan. 31.—Rep. Stanley Budge, R.-Ida., has selected four Idaho youths as candidates for the U. S. naval academy at Annapolis, Md.

Lyle Boyd Johnson, son of Mr. and Mrs. Lyle W. Johnson, Pocatello, was named as principal applicant.

Alternates selected by Budge were John Theodore Byrd, son of Mrs. Albert Byrd Irons, Wendell; Ronald W. Raby, son of Dr. and Mrs. C. B. Raby, Raby; and Robert H. Barry, son of Mr. and Mrs. John R. Barry, Raby.

The day we fill your tank with Shell Heating Oil, these two "Hileguards" go to work to protect your burner filter and your storage tank.

FOA-XX Only Shell Heating Oil—the premium end fuel—one of the biggest developments in home heating fuels. Prevents clogging of your burner's filter screen.

SONITOR. This Shell additive concentrates the action of condensation which may be present in the bottom of your tank—prevents many tank failures. Our driver adds it automatically on your first Shell fill—at no cost to you.

neled by members of the congregation over the past two years. The dedication services are slated for 2:30 p.m. Feb. 9.

Maneuvers Start

NEUMUNSTER, GERMANY, Jan. 31.—British and German troops marched side by side into "battle" yesterday for the first time since the Boxer rebellion in China 35 years ago.

The troops were taking part in a three-day NATO training exercise along with Danish forces. During the 1900 Boxer rebellion, British and German troops fought in an international force which quelled an uprising by Chinese secret societies known as the Boxers.

How to get free protection for your Oil Heat System

The day we fill your tank with Shell Heating Oil, these two "Hileguards" go to work to protect your burner filter and your storage tank.

FOA-XX Only Shell Heating Oil—the premium end fuel—one of the biggest developments in home heating fuels. Prevents clogging of your burner's filter screen.

SONITOR. This Shell additive concentrates the action of condensation which may be present in the bottom of your tank—prevents many tank failures. Our driver adds it automatically on your first Shell fill—at no cost to you.
